## EDUCATION

### Arizona State University

*Bachelor of Science in Computer Science emphasis in Cybersecurity*

Tempe, AZ

Aug. 2022 – May 2026

## EXPERIENCE

### Technology Architecture Analyst

June 2025 – August 2025

*Accenture*

*Los Angeles, CA*

- Contributed to DevOps workflows by supporting CI/CD pipeline automation, reducing deployment time by 15% and enabling faster issue-to-release cycles.
- Diagnosed and remediated backend security vulnerabilities and logic defects in TypeScript services, decreasing crash frequency by 20%.
- Queried, cleansed, and validated large datasets through Amazon Athena to troubleshoot downstream data issues, increasing data accuracy by 32% for analytics teams.
- Deployed and monitored Azure cloud resources using enterprise DevOps tooling, strengthening service stability.

### Supervisor

August 2021 – Present

*Dairy Queen*

*Tempe, AZ*

- Led and motivated a diverse team to ensure smooth daily operations while maintaining high service standards.
- Managed scheduling and delegated responsibilities, ensuring appropriate staffing levels to meet customer demands.
- Collaborated with upper management to implement new initiatives, driving improvements in customer experience.

### Member

December 2021 – Present

*Society of Hispanic Professional Engineers (SHPE)*

*Tempe, AZ*

- Engaged in professional development workshops focused on leadership, communication, and technical skills.
- Networked with industry professionals during SHPE events, fostering relationships with potential mentors and employers.
- Participated in Hackathons and programming challenges hosted by ASU SHPE, worked with a team to solve these challenges and built relationships with them.

## PROJECTS

### Password Manager | *Python, Cryptography, JSON, Script*

February 2024

- Developed a secure password manager utilizing AES-GCM encryption scheme with unique nonce generation.
- Implemented key derivation using Script for enhanced security and password complexity generation.
- Created JSON-based storage system with encrypted password retrieval functionality.

### Web Scraping for Data Security | *Python, Regular Expressions, Web Scraping*

August 2024

- Built automated web scraper to detect exposed sensitive information including emails and API keys.
- Implemented regular expression patterns to identify potential security vulnerabilities in plaintext data.
- Demonstrated proactive security measures by alerting users to potential information leaks.

### Interactive Web Application | *JavaScript, HTML/CSS, Supabase, Canvas API*

March 2025

- Developed a full-stack web application with real-time data synchronization and cloud storage integration.
- Implemented secure authentication, file upload with automatic compression, and responsive design for mobile devices.
- Built interactive features including animated canvas elements, countdown timers, and dynamic content management.
- Integrated Supabase backend for database operations and cloud storage with 49MB file handling capabilities.

## TECHNICAL SKILLS

**Languages:** Java, Python, C, C++, SQL, JavaScript, HTML/CSS

**Frameworks:** Node.js

**Cloud/DevOps Tools:** AWS (Athena, S3), Microsoft Azure, CI/CD

**Developer Tools:** Git, VS Code, Visual Studio, IntelliJ, Eclipse

**Cyber Security Tools:** WireShark, Nmap

**Relevant Courses:** Intro to Cybersecurity, Network Security, Operating Systems
